# About the course Programming From Scratch

### Course Presenter : hexdump

Programming From Scratch course is designed for beginners who have no prior programming experience. Explore the fundamentals of programming concepts, including variables, data types, control structures, and functions. Learn to write code in a beginner-friendly programming language and gain hands-on experience through practical exercises. This course provides a solid foundation for starting your programming journey and building the skills needed for further programming exploration. Join Programming From Scratch and unlock the world of coding. hexdump
