About the course CISA Protection of Information Assets

Course Presenter : Audit Academy

CISA - Protection of Information Assets Course: In this course, you will learn essential knowledge and skills to protect information assets as a Certified Information Systems Auditor (CISA). Explore information systems auditing, governance, acquisition, development, and implementation. Understand risk management, incident response, and security operations. With practical exercises, gain expertise in assessing and securing information assets. Suitable for professionals in IT auditing and cybersecurity, this course equips you to identify vulnerabilities, implement controls, and ensure the integrity and confidentiality of information assets in organizations. Audit Academy

Computer Science Category's Courses

Course Lesson(23)

Lesson 1 : **1 Importance Of Information Security**

Lesson 2 : **2 System Access Permission**

Lesson 3 : **3 Information Security Management**

Lesson 4 : **4 Human Resources Security and Third Parties**

Lesson 5 : **5 Computer Crimes**

Lesson 6 : **6 Security Incident Handling and Response**

Lesson 7 : **7 Logical Access**

Lesson 8 : **8 Identification and Authentication**

Lesson 9 : **9 Identification and Authentication**

Lesson 10 : **10 Common Connectivity Methods**

Lesson 11 : **11 Intrusion Detection and Confidential Information Security**

Lesson 12 : **12 Network Infrastructure Security**

Lesson 13 : **13 Network Infrastructure Security**

Lesson 14 : **14 Firewall Security System**

Lesson 15 : **15 Intrusion Detection System IDS**

Lesson 16 : **16 Encryption Viruses Voip and PBX**

Lesson 17 : **17 Auditing Information Security Management Framework**

Lesson 18 : **18 Auditing Network Infrastructure Security**

Lesson 19 : **19 Auditing Network Infrastructure Security**

Lesson 20 : **20 Environmental Exposures and Controls**

Lesson 21 : **21 Physical Access Exposures and Controls**

Lesson 22 : **22 Mobile Computing**

Lesson 23 : **23 Quick review**
