About the course CISA Information Systems Operations

Course Presenter : Audit Academy

CISA Information Systems Operations Course: In this course, you will learn essential skills for information systems operations as a Certified Information Systems Auditor (CISA). Explore IT governance, systems and infrastructure life cycle, hardware and software acquisition, and implementation. Understand IT service delivery, support processes, and business continuity. With practical exercises, gain expertise in ensuring efficient and secure operations of information systems. Suitable for IT professionals, this course equips you to assess, manage, and optimize information systems operations, enhancing the reliability and availability of IT services in organizations Audit Academy

Computer Science Category's Courses

Course Lesson(24)

Lesson 1 : **1 Information Systems Operations**

Lesson 2 : **2 Information Systems Operations**

Lesson 3 : **3 Information Systems Operations**

Lesson 4 : **4 Information Systems Hardware**

Lesson 5 : **5 Information Systems Hardware**

Lesson 6 : **6 IS Architecture and Software**

Lesson 7 : **7 Database Management Systems DBMS**

Lesson 8 : **8 Database Structure and Models**

Lesson 9 : **9 Relational Database Model**

Lesson 10 : **10 Database Controls**

Lesson 11 : **11 Network Infrastructure**

Lesson 12 : **12 Open Systems Interconnection OSI**

Lesson 13 : **13 The Application of OSI in Network**

Lesson 14 : **14 The Application of OSI in Network**

Lesson 15 : **15 LAN and WAN**

Lesson 16 : **16 WAN Devices and Technologies**

Lesson 17 : **17 Wireless Network**

Lesson 18 : **18 General Internet Terminology**

Lesson 19 : **19 Network Administration**

Lesson 20 : **20 Client Server Technology**

Lesson 21 : **21 Disaster Recovery Planning DRP**

Lesson 22 : **22 DRP**

Lesson 23 : **23 DRP**

Lesson 24 : **24 Quick Review**
