About the course Intents in android development

Intents in android course, in this course we'll explore the powerful capabilities of Intents in Android app development. Intents are a fundamental feature used for communication between different components within an app and between different apps on the device. You'll learn how to use Intents to start new activities, initiate services, broadcast messages, and interact with other app components in various ways. We'll cover both explicit Intents, which specify a specific component by class name, and implicit Intents, which specify the type of action to be performed without specifying a specific component. By the end of this course, you'll have a solid understanding of Intents and how to leverage them to create dynamic and interactive Android applications. Let's dive into the world of Intents in Android together.

Mobile Development Category's Courses

Course Lesson(3)

Lesson 1 : **Intents in Android Explicit and Implicit Intent with Examples**

Lesson 2 : **How to send Data from One Activity to Another Activity Explicit Intent Example**

Lesson 3 : **Android Studio Tutorial Quote app Tutorial Implicit Intent Example**
