# About the course Fragments in android app development

Fragments in android app course, in this course we'll dive into the world of Fragments in Android app development. Fragments are reusable UI components that allow you to create modular user interfaces by dividing the screen into independent sections. You'll learn how to incorporate Fragments into your Android apps to build dynamic and flexible user interfaces. We'll cover topics such as Fragment lifecycle, Fragment transactions, communication between Fragments, and best practices for Fragment usage. By the end of this course, you'll have a solid understanding of Fragments and how to leverage them to create versatile and interactive Android apps. Let's explore the power of Fragments in Android app development together.

**Mobile Development Category's Courses**

# Course Lesson(9)

Lesson 1 : **Fragments in Android App Development Fragment Tutorial in Android 1**

Lesson 2 : **Fragment Usage Life Cycle of Fragment Fragment Tutorial in Android 2**

Lesson 3 : **How to make fragment in Android â€“ Fragment Tutorial in Android 3**

Lesson 4 : **Fragment Manager Fragment Transition Fragment Tutorial in Android 4**

Lesson 5 : **Fragment App Logic Fragment Tutorial in Android 5**

Lesson 6 : **Fragments Fragments App in Java Complete Example Fragment Tutorial in Android 6**

Lesson 7 : **How to use Fragment in XML â€“ Fragment Tutorial in Android 7**

Lesson 8 :
**How to Code in Fragment GetContext and FindViewById Solution Fragment Tutorial in Android 8**

Lesson 9 : **Fragment Lifecycle in Android Android Studio Tutorial**
