About the course House Planning with garden design basics

House Planning with garden design course, in this course we will learn about House Planning with Garden Design, focusing on the integration of indoor and outdoor spaces to create harmonious and functional living environments. The course covers essential principles of residential architecture and landscape design, teaching students how to seamlessly incorporate gardens into house plans. Participants will explore various garden styles, plant selections, and landscaping techniques that enhance the aesthetic appeal and environmental sustainability of the home. Topics include space planning, site analysis, and the use of eco-friendly materials to create sustainable and visually pleasing garden spaces. Through practical exercises and real-world case studies, students will gain hands-on experience in designing homes with integrated gardens, ensuring a balance between functionality, beauty, and sustainability. By the end of the course, participants will be proficient in creating detailed house plans that feature thoughtfully designed gardens, enhancing the overall living experience. This course is ideal for aspiring architects, landscape designers, and anyone interested in creating beautiful and sustainable residential environments.
