About the course Google sheets formulas and functions

Google sheets formulas and functions course, in this course we will learn about Google Sheets formulas and functions, designed to enhance your data analysis and spreadsheet management skills. We start by exploring basic formulas for arithmetic operations, such as addition and subtraction, and progress to more advanced functions like SUM, AVERAGE, and COUNT to perform calculations on your data. You will also learn how to use logical functions like IF, and lookup functions such as VLOOKUP and HLOOKUP to retrieve and manipulate data efficiently. The course covers text functions for data cleaning, date functions for managing time-based information, and array formulas for handling complex data scenarios. Additionally, we will delve into creating dynamic reports, automating tasks, and troubleshooting common formula errors. By the end of this course, you'll be proficient in using Google Sheetsâ€™ formulas and functions to streamline data processing and enhance your productivity. Ideal for users looking to master spreadsheet functions and improve their analytical capabilities.
