About the course Google sheets sidebar web app development

Google sheets sidebar web app course, in this course we will learn about the Google Sheets sidebar web app. This development course teaches you how to create interactive and dynamic web applications within the sidebar of Google Sheets using Google Apps Script. You'll start by understanding the basics of Google Apps Script, a JavaScript-based platform that allows you to automate tasks and extend the functionality of Google Sheets. We will delve into designing user interfaces (UI) with HTML, CSS, and JavaScript, enabling you to create forms, buttons, and other interactive elements. You'll learn how to interact with Google Sheets data, including reading from and writing to the spreadsheet, and executing custom functions. Throughout the course, you will work on practical examples and real-world applications, such as data analysis tools, project management apps, and automation scripts. You'll also explore how to integrate your sidebar app with other Google services like Gmail, Drive, and Calendar to enhance its capabilities. By the end of this course, you will have the skills to develop powerful and efficient sidebar web apps, improving productivity and data management within Google Sheets. This course is perfect for developers, data analysts, and anyone looking to leverage the full potential of Google Sheets through custom web applications.

Computer Science Category's Courses

Course Lesson(6)

Lesson 1 :
Google Sheets Sidebar App HTML JavaScript Web App to Delete Multiple Worksheets Part 1

Lesson 2 :
Build User Interface with Metro UI HTML JavaScript Google Sheets Sidebar Apps Script Part 2

Lesson 3 : **Get a List of All Worksheets in Google Sheets Apps Script Part 3**

Lesson 4 : **Delete Worksheets in Bulk using Apps Script in Google Sheets Part 4**

Lesson 5 :
Confirmation Dialog Prompt Using Metro UI JavaScript Apps Script in Google Sheets Part 5

Lesson 6 : **Add Metro UI Progress Spinner to Our User Interface Other UI Improvements Part 6**
