Mindluster Platform

About the course Google sheets UI with apps script

Google sheets UI with apps course, in this course we will learn about the powerful capabilities of Google Sheets UI with Apps Script, a JavaScript-based platform that allows you to create custom functionalities and enhance the user interface of Google Sheets. Google Sheets UI with Apps Script enables you to add custom menus, dialogs, sidebars, and interactive forms, making your spreadsheets more dynamic and user-friendly. Throughout this course, you will start by understanding the basics of Google Apps Script, including its interface, key features, and how to set up your development environment. You will learn how to create custom menus that integrate seamlessly into Google Sheets, allowing you to execute scripts and automate tasks with a single click. We will delve into creating custom dialogs and sidebars using HTML, CSS, and JavaScript, providing a rich and interactive user experience. Additionally, the course will cover advanced topics such as designing and implementing custom forms for data entry, automating repetitive tasks, and integrating Google Sheets with other Google services like Gmail, Google Drive, and Google Calendar. By the end of this course, you will be able to transform your Google Sheets into powerful, interactive applications tailored to your specific needs.
