About the course HTML layout elements basics

HTML layout elements course, in this course we will learn about HTML layout elements, which are fundamental tools used in HTML to design and structure the layout of web pages. HTML layout elements help organize content and distribute it flexibly and systematically on the page. By using these elements, developers can create interactive and visually appealing web pages, ensuring the content is displayed effectively across various devices. Throughout this course, you will start by understanding the basics of HTML layout elements such as and . The element is a block-level container used to group other elements together and apply styles using CSS. It acts as a section or a group of elements within the page. The element is an inline container used to group text or other inline elements within a line of text, allowing you to apply styles without affecting the overall layout of the page. We will then explore more advanced layout techniques, including the use of Flexbox and Grid. Flexbox is a layout model that provides a simple way to arrange elements within a container, allowing for responsive design. Grid layout, on the other hand, offers a two-dimensional grid-based layout system, enabling the creation of complex web page layouts with ease. By the end of this course, you will have a comprehensive understanding of how to use HTML layout elements to build modern, responsive, and visually appealing web pages. This course is ideal for web developers, designers, and anyone looking to enhance their web development skills. Whether you are a beginner or have some experience with HTML, this course will equip you with the knowledge and skills to effectively use HTML layout elements in your projects.

Programming Category's Courses

Course Lesson(10)

Lesson 1 : **HTML Tutorial HTML5 Crash Course for a JavaScript Developer Part 1**

Lesson 2 : **HTML Input Dropdown Checkbox Radio HTML5 JavaScript Part 2**

Lesson 3 : **HTML Lists Tables Meta Tags Styles Add Remove Classes HTML5 JavaScript Part 3**

Lesson 4 : **HTML Layout Elements Div Section etc CSS Flexbox HTML5 JavaScript Part 4**

Lesson 5 : **HTML Input Box Value Javascript Number parseInt parseFloat HTML5 JavaScript Part 5**

Lesson 6 : **HTML Data Attributes JavaScript Dataset Property HTML5 JavaScript Part 6**

Lesson 7 :
JavaScript Create HTML Adding to Removing Elements from DOM HTML5 JavaScript Part 7

Lesson 8 : **HTML Template Tag HTML5 JavaScript Part 8**

Lesson 9 : **JavaScript Event Listeners Click Event HTML5 JavaScript Part 9**

Lesson 10 : **Detect Clicks Using Parent Elements Event Bubbling HTML5 JavaScript Part 10**
