About the course Excel filter function basics for beginners

Excel filter function basics course, in this course we will learn about the Excel FILTER function basics. This course is designed to introduce you to the fundamental aspects of the FILTER function in Excel, a powerful tool for dynamically filtering data in your spreadsheets. You will learn how to use the FILTER function to extract specific data subsets from larger datasets based on given criteria. The course will cover the basic syntax of the FILTER function, how to apply multiple conditions, and how to handle common errors that may arise during use. Through practical examples and real-world applications, you will gain the skills to quickly and easily filter data, making your data analysis tasks more efficient and effective. Additionally, the course will delve into advanced topics such as combining the FILTER function with other Excel functions to create more complex and dynamic data analysis solutions. By the end of this course, you will be proficient in using the FILTER function to organize and analyze data, enhancing your overall productivity in Excel. This course is ideal for both beginners and experienced users looking to refine their data management skills and leverage the full potential of Excel's filtering capabilities.

Computer Science Category's Courses

Course Lesson(8)

Lesson 1 : **Excel FILTER Function Across Multiple Worksheets**

Lesson 2 : **Excel FILTER Function Top or Bottom n Values With Criteria**

Lesson 3 :
Excel FILTER Function Case Sensitive Filter How to Perform a Case Sensitive Filter in Excel

Lesson 4 :
Excel FILTER Function Return Duplicates Identify Duplicates Across Two Columns Using Formula

Lesson 5 : **Excel FILTER Function Sort on Multiple Columns FILTER SORT Together**

Lesson 6 :
Excel FILTER Function Non Adjacent Columns Return Specific Columns Reorder Columns

Lesson 7 :
Excel FILTER Function with WILDCARD Criteria Partial Match Contains Begins With Ends With

Lesson 8 : **Excel FILTER Function Multiple Criteria AND OR Criteria**
