About the course Statistical functions in excel for beginners

Statistical functions in excel course, in this course we will explore Statistical Functions in Excel, a key aspect of data analysis and decision-making. Starting with the basics, you will learn to use fundamental statistical functions such as AVERAGE, MEDIAN, MODE, and STDEV to analyze and summarize data. We will delve into more advanced functions like CORREL for understanding relationships between variables, and LINEST for regression analysis. You'll discover how to apply these functions to real-world data sets to perform hypothesis testing, create forecasts, and analyze trends. The course will also cover the use of the Data Analysis Toolpak for complex statistical tasks. By the end of the course, you'll be adept at using Excel's statistical tools to gain insights from data, make informed decisions, and present your findings effectively. Join us to master the statistical functions in Excel and enhance your data analysis skills.

Computer Softwares Category's Courses

Course Lesson(3)

Lesson 1 : **Calculate Variance and Standard Deviation in Excel Sample Population**

Lesson 2 : **Perform a T Test in Excel Get P Value from T Test in Excel**

Lesson 3 :
Calculate a 95 Confidence Interval 2 Methods CONFIDENCE T Function the Analysis ToolPak
