About the course VBA code for freeze panes in excel

VBA code for freeze panes course, in this course we will delve into how to automate the Freeze Panes feature in Excel using VBA (Visual Basic for Applications). Freeze Panes is essential for keeping specific rows or columns visible while scrolling through large worksheets. This course covers various VBA techniques to manage Freeze Panes effectively. You will learn to write VBA code to freeze the top row, the first column, or both simultaneously. We will start by understanding how to unfreeze any existing panes, then move on to apply freeze panes to different sections of your worksheet. By the end of this course, you will be proficient in automating the Freeze Panes feature, enhancing your productivity and improving data visibility in Excel. Whether you need to keep headers, labels, or other critical data in view, this course will provide you with the tools and knowledge to achieve this using VBA.

Computer Science Category's Courses

Course Lesson(22)

Lesson 1 : **How to Reference a Cell in Excel VBA**

Lesson 2 : **Reference a Range or Multiple Ranges in Excel VBA**

Lesson 3 : **Reference a Selection of Cells the Active Cell Current Region in Excel VBA**

Lesson 4 : **Excel VBA to Copy Move Data Within Sheet to Another Sheet or Another Workbook**

Lesson 5 :
Move or Copy Rows Columns Using Excel VBA Including Move to Another Sheet and Move to End of Data

Lesson 6 : **Select to the Last Row or Column With Data in Excel using VBA Macro**

Lesson 7 : **How to Use the Intersect Method in Excel VBA Multiple Ranges Row and Column**

Lesson 8 : **How to Use the Offset Property in Excel VBA**

Lesson 9 : **Excel VBA How to Sort Data with VBA Macro**

Lesson 10 : **Excel VBA code for Freeze Panes**

Lesson 11 :
Excel VBA Macro to Loop Through and Enter Text in Each Worksheet Within a Workbook

Lesson 12 : **How to Lock Protect Formulas In Excel but Allow Input Using a VBA Macro**

Lesson 13 : **Replace Blank Cells with Zeros in Excel with VBA Macro**

Lesson 14 : **Excel VBA Macro to Paste Values Number Formatting But Not Formulas**

Lesson 15 : **AutoRefresh PivotTable When Data Source Changes**

Lesson 16 : **Protect ALL Sheets in an Excel Workbook using a Macro**

Lesson 17 : **How to Use Excel VBA s For Next Loop**

Lesson 18 : **Introduction to Excel VBA Do While and Do Until Loops**

Lesson 19 : **Excel VBA Combine Workbooks in a Folder into a New Workbook**

Lesson 20 :
Create User Defined Custom Function in Excel Using the LAMBDA Function No VBA Required

Lesson 21 :
How to Transfer Data From One Worksheet to Another Automatically in Excel Using VBA Macro

Lesson 22 : **VBA Macro Split Excel Worksheet into Multiple Worksheets Based on Column Value**
