# About the course XLOOKUP multiple columns in excel

XLOOKUP multiple columns in excel course, in this course you'll learn how to leverage the XLOOKUP function to perform lookups across multiple columns efficiently. We start with the fundamentals of XLOOKUP, exploring how it replaces older functions like VLOOKUP and HLOOKUP, and extend its capabilities to handle complex scenarios involving multiple columns. You'll discover how to search for values using single or multiple criteria, retrieve data from various columns, and manage return arrays. Practical examples and hands-on exercises will guide you through combining lookup values, handling arrays, and performing dynamic lookups. By the end of the course, you'll be able to streamline data retrieval tasks and enhance your Excel data analysis skills using XLOOKUP across multiple columns.
