About the course Creating recorded macros in excel

Creating recorded macros in excel course, in this course we will delve into the world of creating recorded macros in Excel, a powerful tool to automate repetitive tasks and enhance productivity. Starting with the basics, you will learn how to record a macro, assign it a meaningful name, and choose where to store it for optimal accessibility. We will then guide you through the process of performing and recording various actions in Excel, such as formatting cells, entering data, and applying formulas, to create a seamless automation script. Participants will gain hands-on experience in managing and running recorded macros, ensuring efficient execution of routine tasks. Additionally, the course will cover best practices for editing and optimizing macros using the Visual Basic for Applications (VBA) editor, allowing for customization and enhancement of recorded macros. By the end of this course, you will be proficient in creating and utilizing recorded macros to streamline your workflows, reduce manual effort, and eliminate errors. Whether you are a beginner or an intermediate Excel user, this course will equip you with the skills to harness the full potential of Excel macros, making your data management and analysis tasks more efficient and effective. Join us to master the art of creating recorded macros in Excel and take your productivity to the next level.

Computer Science Category's Courses

Course Lesson(5)

Lesson 1 : **The Excel Macro Recorder Using Relative References**

Lesson 2 : **Excel Macros Relative References Do While Looping**

Lesson 3 : **Excel Macros That Format Copy and SUM Whatever Your Table Size**

Lesson 4 : **Protect ALL Sheets in an Excel Workbook using a Macro**

Lesson 5 : **Delete Filtered Records In Excel with a Recorded Macro**
