About the course Building an interactive excel dashboard

Building an interactive excel dashboard course, in this course we will delve into the process of building an interactive Excel dashboard. You will start by learning the fundamentals of data collection and organization, essential for creating a cohesive and effective dashboard. The course will guide you through the use of pivot tables and charts to visually represent your data in an engaging manner. We will explore the use of tools like Slicers and conditional formatting to enhance interactivity and user-friendliness. Additionally, you will learn how to link data from various sources and ensure your dashboard is automatically updated, keeping it relevant and accurate. By the end of this course, you will be proficient in designing and implementing interactive Excel dashboards that meet business needs and provide advanced data analysis. This hands-on training will equip you with the skills to create dynamic and visually appealing dashboards, transforming raw data into meaningful insights. Join us now to elevate your Excel expertise and master the art of building interactive dashboards.
