# About the course PDF editing for beginners

PDF editing course, in this course you will learn the essential skills and advanced techniques for editing PDF documents efficiently and effectively. Designed for both beginners and experienced users, this course will guide you through the various tools and methods available for modifying PDFs to meet your specific needs. You will start with an introduction to PDF editing, understanding the basics of PDFs and the common scenarios where editing is required. The course will cover fundamental tasks such as adding, deleting, and rearranging pages, as well as editing text and images within a PDF. Youâ€™ll also learn how to annotate documents, add comments, and highlight important information. Advanced topics include using OCR (Optical Character Recognition) to edit scanned documents, merging multiple PDFs into a single file, and splitting large PDFs into smaller sections. The course will also explore how to secure your PDFs with passwords and permissions, ensuring your documents are protected from unauthorized access. Throughout the course, you will work with various PDF editing software, including Adobe Acrobat, to understand the strengths and capabilities of each tool. Practical examples and hands-on exercises will help you apply what you've learned, ensuring you can handle real-world PDF editing tasks with confidence.
