About the course Google sites essentials for beginners

Google sites essentials course, in this course we will start by exploring the fundamental tools and features that Google Sites offers for creating and customizing your own website. You'll learn how to start from scratch or use templates to design a professional-looking site without needing any coding skills. Weâ€™ll guide you through setting up your site, choosing the right layout, and customizing the design to match your brand or personal style. The course will cover how to add and manage content, including text, images, videos, and embedded elements, to create an engaging and interactive user experience. You'll also discover how to integrate other Google Workspace tools, such as Google Drive and Google Calendar, to enhance your site's functionality. Additionally, weâ€™ll discuss best practices for organizing your site's navigation and structure, ensuring it is user-friendly and easy to maintain. By the end of this course, youâ€™ll have the knowledge and confidence to create, publish, and manage a fully functional website using Google Sites, whether it's for personal use, a small business, or an educational project. Join us to master the essentials of Google Sites and bring your online presence to life.
