Mindluster Platform

About the course Terraform basics for beginners

Terraform basics course, in this course we will learn about Terraform Basics, focusing on the fundamental concepts and practices of using Terraform, an open-source tool that enables Infrastructure as Code (IaC). Terraform allows you to define, provision, and manage cloud infrastructure using a simple, declarative language. This course covers the essential topics you need to get started with Terraform, including setting up your environment, writing and organizing Terraform configuration files, and using Terraform commands to create and manage resources across various cloud providers. You'll learn how to use Terraform to automate the deployment of infrastructure, ensuring consistency, scalability, and repeatability. The course also explores Terraform state management, which helps track and manage your infrastructure, and how to use modules to organize and reuse configurations effectively. By the end of this course, you will have a solid understanding of how to use Terraform to manage cloud infrastructure, enabling you to implement Infrastructure as Code practices in your projects. Whether you're a beginner looking to get started with Terraform or a practitioner wanting to solidify your foundational knowledge, this course provides the skills necessary to leverage Terraform's powerful capabilities in automating cloud infrastructure.

Computer Science Category's Courses

Course Lesson(10)

Lesson 1 : **HTTPS Content Based Load Balancer with Terraform GSP206**

Lesson 2 : **Creating Spanner Instances and Databases CLI and Terraform SCBL002**

Lesson 3 : **Automating the Deployment of Networks with Terraform GSP460**

Lesson 4 : **Infrastructure as Code with Terraform**

Lesson 5 : **Modular Load Balancing with Terraform Regional Load Balancer GSP191**

Lesson 6 : **Managing Terraform State GSP752**

Lesson 7 : **Interact with Terraform Modules GSP751**

Lesson 8 : **Terraform Fundamentals GSP156**

Lesson 9 : **Validating Policies for Terraform on Google Cloud GSP1021**

Lesson 10 : **Change firewall rules using Terraform and Cloud Shell**
