About the course Database administration essentials

Database administration essentials course, in this course we will learn about Database Administration Essentials, focusing on the core skills and knowledge required to manage and maintain database systems effectively. Database administration is a critical function in IT, ensuring that databases are available, secure, and optimized for performance. This course covers the essential topics that every aspiring database administrator needs to master, including database installation, configuration, and management. We will explore how to set up and configure popular database management systems (DBMS) like MySQL, SQL Server, and Oracle. You will learn how to manage user accounts and permissions to ensure data security and integrity. The course also delves into backup and recovery strategies, teaching you how to safeguard data and restore it in case of system failures. Additionally, you'll gain insights into monitoring and tuning database performance to prevent bottlenecks and optimize queries. Security is another key focus, with best practices for protecting databases against internal and external threats. By the end of this course, you will have a solid foundation in database administration, equipping you with the skills to manage databases confidently and efficiently, ensuring they run smoothly and securely. This course is ideal for beginners or IT professionals looking to enhance their database management capabilities.

Computer Science Category's Courses

Course Lesson(11)

Lesson 1 : **Intro to Databases**

Lesson 2 : **What Database Jobs are Available**

Lesson 3 : **Using Certifications to Start Your DBA Career**

Lesson 4 : **What Technologies Are Used in Database Administration**

Lesson 5 : **Terms You Need to Know in Database Administration**

Lesson 6 : **What is the SQL Language**

Lesson 7 : **How to Design Your First Database**

Lesson 8 : **How to Create Your First Database**

Lesson 9 : **What You ll Do as a Database Pro**

Lesson 10 : **Databases in the Real World**

Lesson 11 : **How to Get into Database Administration**
