About the course Wireless sniffing fundamentals for beginners

Wireless sniffing fundamentals course, in this course we will learn about the Wireless Sniffing fundamentals. You'll delve into the core concepts and methods used to capture and analyze wireless network traffic, providing you with a comprehensive understanding of how wireless sniffing operates. The course will introduce you to the tools and software commonly used in the field, guiding you through the process of monitoring and intercepting data on Wi-Fi networks. You'll learn how to effectively capture wireless packets, decode their structure, and analyze the data to assess network performance and security vulnerabilities. Additionally, the course will cover important ethical considerations, including the legal implications of wireless sniffing and how to conduct it responsibly within the boundaries of the law. By the end of this course, you'll have the foundational knowledge needed to apply wireless sniffing techniques in a variety of contexts, making it ideal for IT professionals, network administrators, security analysts, and anyone interested in enhancing their understanding of wireless network security.

Computer Science Category's Courses

Course Lesson(6)

Lesson 1 : **MicroNugget How to Use Wireshark with GNS3**

Lesson 2 : **MicroNugget How to Use the http time Feature in Wireshark**

Lesson 3 : **How to Build a Topology in GNS3 1 x Configure Network Time Protocol**

Lesson 4 : **MicroNugget How to Contain Rogue Access Points in a WLAN**

Lesson 5 : **MicroNugget What is Wireless Sniffing**

Lesson 6 : **MicroNugget SNMPv3**
