About the course Placing Video inside text in filmora 9 2024

Placing Video inside text in filmora 9 course, in this course you will learn how to create a dynamic and visually engaging effect by placing video inside text using Filmora 9, a user-friendly video editing software. This technique, known as text masking, allows you to display your video within the shapes of letters, making it perfect for creating captivating title sequences, intros, or even artistic social media content. Weâ€™ll start by guiding you through the basic steps, such as choosing the right video clip and selecting the text style that best fits your project. Youâ€™ll learn how to create bold and legible text, apply the masking effect, and position the video clip within the text for maximum impact. Weâ€™ll also cover adjusting the text size, font, and placement to make sure the video integrates smoothly with your design. Throughout the course, youâ€™ll explore more advanced options, such as applying transitions, adding backgrounds, and combining other effects to enhance the overall look. We will also cover how to export your project in high quality, ensuring itâ€™s ready for professional use or sharing online.
