About the course Installing Joomla 4 on Localhost with XAMPP

Installing Joomla 4 on Localhost course, in this course you will learn how to install Joomla 4 on your local computer, also known as setting up Joomla on localhost. This setup allows you to build, test, and develop Joomla websites offline, providing a secure and flexible environment for experimenting with new features and configurations before going live. Weâ€™ll start by introducing you to the essential tools needed, such as XAMPP or WAMP, which are local servers that allow you to run Joomla on your machine. You will be guided through the process of downloading Joomla 4, setting up a database, and configuring your localhost environment. The course covers step-by-step instructions on how to create the database, configure Joomla's installation settings, and solve potential issues that might arise during installation. Youâ€™ll also learn how to manage your Joomla files and settings for smooth operation.
