About the course Building a website with Joomla 4 or Joomla 5

Building a website with Joomla 4 course, in this course you will learn how to build a professional website using Joomla 4, one of the most powerful and flexible content management systems (CMS) available. Weâ€™ll guide you step by step, starting from installing Joomla 4 on a web server or localhost, to customizing the design and structure of your website. You'll begin by exploring Joomla's core features, including creating and managing pages, menus, and categories. We will cover how to choose and install templates to design a visually appealing website, as well as how to add and organize content, such as articles, images, and videos. Youâ€™ll also learn how to extend Joomlaâ€™s functionality by installing and configuring extensions for additional features like forms, galleries, and SEO optimization.
