About the course Locking folders in windows 11 10 or Laptop

Locking folders in windows 11/10 course, in this course you will learn how to lock and secure folders in Windows 11/10, ensuring your sensitive files and data are protected from unauthorized access. Weâ€™ll start by exploring the built-in security features of Windows, such as BitLocker, which encrypts entire drives, and how to use password-protected compressed folders for individual folder security. Youâ€™ll also learn step-by-step how to create hidden folders with restricted access using batch files, a simple method that does not require additional software. We will dive into advanced folder protection methods, including using third-party software specifically designed for folder locking. These tools provide more flexible options for locking, hiding, and securing specific folders with passwords, ensuring full protection of your personal or professional files. `
