About the course Product Packaging design in Illustrator

Product Packaging design in Illustrator course, in this course you will dive into the world of product packaging design using Adobe Illustrator. Starting from the basics, you'll learn how to create compelling and professional packaging designs that effectively communicate a brandâ€™s identity. The course covers everything from setting up your design space, creating die lines, and selecting the right color schemes, to more advanced techniques like using 3D mockups and illustrations to bring your packaging to life. Youâ€™ll also explore typography, patterns, and custom shapes that make a design stand out on the shelf. Special focus will be given to ensuring your packaging design is print-ready, learning about color modes, print formats, and proper file export settings to meet professional printing standards. This course is perfect for beginners and intermediate users alike, providing hands-on projects that allow you to apply the knowledge you gain in real-world scenarios. By the end, youâ€™ll have the skills to create stunning packaging designs that not only look great but also serve their practical purpose effectively.
