About the course Modern authentication on surface hub

Modern authentication on surface hub course, in this course we will explore Modern Authentication on Surface Hub, focusing on how to secure access to Microsoft services such as Microsoft 365 and Teams. Weâ€™ll start by understanding what Modern Authentication is and how it differs from Basic Authentication, using advanced protocols like OAuth and OpenID Connect to ensure safer and more reliable authentication. You will learn how to set up and configure Modern Authentication on your Surface Hub, enabling features like Multi-Factor Authentication (MFA) to add an extra layer of security. The course will guide you through the step-by-step process of securing data and preventing unauthorized access, especially in collaborative meeting environments. We will also cover how to troubleshoot common authentication issues and integrate Modern Authentication seamlessly with your organization's existing security infrastructure. By the end of this course, you'll be equipped to implement and manage Modern Authentication on Surface Hub, improving security and compliance across your devices and networks.
