About the course Merging shapes in powerpoint for beginner

Merging shapes in powerpoint course, in this course we will learn about merging shapes in PowerPoint, focusing on how to create custom designs, logos, and visually dynamic presentations by combining shapes. Youâ€™ll begin by exploring the Merge Shapes tool, which allows you to combine, subtract, intersect, and fragment shapes to form unique, custom shapes. Weâ€™ll guide you through the basic functions like Union, Combine, Fragment, and Subtract, demonstrating how each can be used to build complex designs from simple shapes. As the course progresses, you'll learn advanced techniques to create logos, infographics, and other visual elements that enhance your presentations. We'll cover how to strategically layer shapes, use transparency, and apply formatting effects like gradients, shadows, and outlines. You'll also discover how to merge text with shapes and how to adjust alignment and proportions for professional-looking results.

Computer Softwares Category's Courses

Course Lesson(6)
