About the course Creating a website in google sites

Creating a website in google sites course, in this course we will dive into Creating a Website in Google Sites, where youâ€™ll learn how to build a fully functional and visually appealing website without the need for coding experience. We will begin by guiding you through the basics of Google Sites, including choosing a template, adding and organizing content such as text, images, videos, and links. You will discover how to customize the layout and design elements to create a unique website that suits your personal or business needs. The course will also cover how to add multiple pages, create a navigation structure, and utilize built-in features such as embedding Google Maps, forms, and calendars for interactive functionality. Additionally, we will explore best practices for website organization, accessibility, and search engine optimization (SEO). By the end of this course, you will be able to publish and manage your website, ensuring it meets your goals for professional or educational use. This course is ideal for beginners, educators, and small business owners looking to create a web presence easily and effectively using Google Sites.
