About the course Google sheets dynamic chart techniques

Google sheets dynamic chart course, in this course you will learn how to create and manage dynamic charts to visualize data in a highly interactive and automated way. Dynamic charts in Google Sheets update automatically when the underlying data changes, making them a powerful tool for real-time data analysis and reporting. We will begin by exploring the basics of chart creation, selecting appropriate chart types, and formatting options. As the course progresses, you'll learn how to link charts to dynamic data ranges, use drop-down lists for filtering data, and apply Google Sheets functions like INDIRECT and ARRAYFORMULA to make your charts more responsive. Additionally, we will cover how to create interactive dashboards by combining multiple dynamic charts on one sheet, giving you the ability to monitor and analyze data effortlessly. By the end of this course, you'll have the skills to design fully dynamic and interactive charts, enabling you to present your data with greater impact and accuracy. Whether youâ€™re a beginner or a data enthusiast, this course will elevate your Google Sheets skills.

Computer Softwares Category's Courses

Course Lesson(27)
