About the course Oxygen concentrator technology

Oxygen concentrator course, in this course we will learn about the principles, operation, and applications of oxygen concentrators used in medical and home care settings. The course covers how these devices filter and concentrate oxygen from ambient air to provide continuous oxygen therapy for patients with respiratory conditions like COPD and hypoxemia. Participants will explore the differences between portable and stationary concentrators, proper setup and flow rate adjustments, and safety protocols for effective use. Emphasis will be placed on device maintenance, troubleshooting common issues, and understanding when oxygen concentrators are appropriate for therapy. By the end of the course, learners will be equipped with the knowledge and skills to operate, maintain, and manage oxygen concentrators confidently in clinical and home environments.
