About the course Podiatric medicine fundamentals

Podiatric medicine course, in this course we will learn about the diagnosis, treatment, and prevention of foot, ankle, and lower limb conditions. Podiatric medicine covers biomechanics, diabetic foot care, wound management, and sports injuries. Weâ€™ll explore the use of orthotics, nail surgery, and therapeutic techniques. This course also emphasizes patient care, ethical practices, and clinical skills essential for treating musculoskeletal disorders, infections, and chronic diseases affecting the lower extremities. With a focus on both non-invasive treatments and surgical approaches, students will develop practical knowledge to promote foot health and manage complex podiatric cases effectively.

Medical Category's Courses

Course Lesson(41)

Lesson 1 : **MASTER PODIATRY X RAYS Like a PRO**
