About the course Gastroenterology Fundamentals

Gastroenterology course, in this course we will learn about the essential aspects of the digestive system, including its structure, function, and related disorders. Students will explore diagnostic techniques like endoscopy and imaging, along with the management of conditions such as inflammatory bowel disease, liver diseases, and gastrointestinal cancers. The course covers gastrointestinal pharmacology, pediatric gastroenterology, and advances in treatments for hepatitis and pancreatic disorders. Special attention will be given to functional and motility disorders, nutrition therapy, and the role of the gut microbiome. Through practical case studies, students will gain clinical insights and prepare for patient care in diverse gastroenterological scenarios.
