About the course Cancer warning signs and symptoms

Cancer warning signs course, in this course we will learn about the critical signs and symptoms that may indicate the early stages of cancer. Participants will explore the importance of identifying warning signs such as unexplained weight loss, persistent cough, unusual bleeding, changes in bowel or urinary habits, skin abnormalities, and lumps or masses. The course covers respiratory, gastrointestinal, neurological, and reproductive health symptoms linked to cancer. Students will also examine the seven key cancer warning signs, along with real-life case studies, risk factors, and the importance of early screening. Emphasis will be placed on when to seek medical help, improving symptom awareness, and applying prevention strategies.
