About the course Aortic aneurysm Fundamentals

Aortic aneurysm course, in this course we will learn about the Aortic Aneurysm course, exploring the causes, symptoms, and management of this potentially life-threatening condition. The course covers the anatomy of the aorta, explaining how aneurysms develop and their classifications, including thoracic and abdominal aortic aneurysms. Participants will learn about the risk factors, such as hypertension and genetic predisposition, and the importance of early detection through diagnostic imaging like CT scans and ultrasounds. The course delves into both medical and surgical treatments, including endovascular aneurysm repair (EVAR) and open surgery. Additionally, we will explore emergency management for ruptured aneurysms and strategies for postoperative care, follow-up, and lifestyle changes to reduce recurrence. This comprehensive course equips learners with the knowledge to understand, diagnose, and manage aortic aneurysms effectively.

Medical Category's Courses

Course Lesson(6)

Lesson 1 : **Angioplasty Â 3D Animation Real Footage**

Lesson 2 : **Recognizing a heart attack 3D Animation**

Lesson 3 : **What is an Aortic Aneurysm 3D Animation**

Lesson 4 : **How the heart works l 3D Tour of the heart**

Lesson 5 : **How our lungs work 3D tour of the lungs**

Lesson 6 : **Learn How to Save a Life in 4 minutes Learning CPR**
