About the course Pregnancy test at home

Pregnancy test course, in this course we will learn about the principles and methods of pregnancy testing, exploring how these tests detect the hormone hCG (human chorionic gonadotropin) in urine or blood to confirm pregnancy. Participants will understand the differences between home-based urine tests and laboratory blood tests, including how to perform and interpret results accurately. The course covers key topics such as the sensitivity and specificity of tests, handling false positives or negatives, and troubleshooting common errors. We will also explore advancements in pregnancy test technology and safety guidelines for accurate testing. This course is ideal for healthcare professionals and individuals seeking to enhance their knowledge of pregnancy diagnostics and testing protocols.
