About the course Abdominal surgerys instruments with names

Abdominal surgerys instruments course, in this course we will learn about the essential instruments used in abdominal surgeries, focusing on their functions, handling, and maintenance. Participants will explore key surgical tools, including scalpels, forceps, scissors, retractors, clamps, and suturing instruments. The course covers the use of specialized devices like laparoscopic instruments and electrosurgical equipment for minimally invasive procedures. We will also address sterilization techniques and safety protocols to ensure patient and staff safety. Through practical sessions, students will gain hands-on experience in selecting and using the correct instruments during different surgical phases. This course is ideal for surgeons, surgical assistants, and healthcare professionals working in operating rooms to enhance their skills in abdominal procedures.

Medical Category's Courses

Course Lesson(18)
