About the course Basic hospital equipments with names

Basic hospital equipments course, in this course we will learn about essential hospital equipment and their functions, focusing on proper usage, maintenance, and safety protocols. Participants will explore key devices such as patient monitors, oxygen concentrators, infusion pumps, ventilators, and ECG machines. The course will also cover diagnostic tools like ultrasound, stethoscopes, thermometers, and glucometers, along with sterilization equipment such as autoclaves. We will address troubleshooting common issues, ensuring accurate readings, and adhering to hygiene standards. Through practical sessions, students will gain hands-on experience operating these devices. This course is ideal for healthcare professionals and technicians aiming to improve their skills in managing and maintaining essential hospital equipment efficiently.
