About the course Med Surg nursing respiratory system

Med-Surg nursing respiratory course, in this course we will learn about the Med-Surg nursing respiratory field, focusing on providing care for patients with respiratory conditions. We will explore the anatomy and physiology of the respiratory system, common disorders like asthma, COPD, pneumonia, and pulmonary embolism, as well as acute issues such as respiratory failure. The course covers key skills in patient assessment, oxygen therapy, ventilator management, and pre- and post-operative care. Additionally, we will discuss medication administration, infection control, and patient education strategies to promote respiratory health and prevent complications. This comprehensive course aims to equip learners with the knowledge to manage both acute and chronic respiratory cases effectively.
