Mindluster Platform

About the course Growth milestones pediatric nursing

Growth milestones pediatric nursing course, in this course we will learn about the Growth Milestones Pediatric Nursing field, focusing on tracking childrenâ€™s physical, cognitive, social, and emotional development at each stage. We will cover key milestones from infancy to adolescence, such as sitting, walking, language acquisition, and social skills, while identifying signs of developmental delays. The course will emphasize the nurse's role in conducting regular assessments, educating parents, and providing interventions to support healthy development. Learners will also explore the importance of nutrition, family involvement, and early detection of growth issues, ensuring children meet their milestones and receive timely care when needed.
