About the course Diaper rash treatment and causes

Diaper rash treatment course, in this course we will learn about the causes, prevention, and treatment of diaper rash in infants and toddlers. We will explore factors like prolonged moisture, friction, fungal or bacterial infections, and allergies to diapers or skincare products. The course covers effective treatment strategies, including frequent diaper changes, applying barrier creams such as zinc oxide, ensuring proper skin ventilation, and using gentle cleansing techniques. Additionally, we will discuss recognizing severe cases that require medical attention and how to guide parents in preventing recurring rashes. This course equips learners with the skills to manage and treat diaper rash effectively, ensuring infant comfort and skin health.
