About the course Aws for data science basics

Aws for data science course, in this course explores AWS solutions like SageMaker for machine learning, Redshift for data warehousing, and Glue for data integration. Learn how to preprocess data, build and deploy models, and analyze insights efficiently. Ideal for data professionals aiming to leverage AWS to streamline workflows, scale applications, and enhance decision-making through cloud technologies. By the end, you'll be equipped to implement data science pipelines, from data collection to model deployment, on the AWS platform, enabling innovation and growth in various industries.
