About the course Data Science with Python conditions

Data Science with Python conditions course, in this course youâ€™ll learn the basics of conditional logic in Python, including if, elif, and else statements, and how to use them effectively to make decisions within your code. Through hands-on exercises, youâ€™ll explore how conditions are used in data wrangling, filtering datasets, and automating tasks. By integrating conditions with Python libraries like Pandas and NumPy, this course demonstrates practical applications in data analysis. Ideal for beginners, this course equips you with the skills to handle decision-making processes in your data science workflows with confidence.

Computer Science Category's Courses

Course Lesson(7)

Lesson 1 : **Python for Data Science Getting Started**

Lesson 2 : **Python for Data Science Variables Lists and Dictionaries**

Lesson 3 : **Python for Data Science Conditions and Loops**

Lesson 4 : **Python for Data Science Functions and String Formatting**

Lesson 5 : **Python for Data Science OOP Clases and Inheritance**

Lesson 6 : **Python for Data Science Importing Functions Packages Making API Calls**

Lesson 7 : **Python for Data Science Writing to Files Reading from Files and Error Handling**
