About the course Automation in Excel

Course Presenter : Excel For Freelancers

Automation in Excel course, in this course is designed to teach you how to streamline and automate tasks in Excel, saving time and enhancing productivity. Youâ€™ll learn to create and use Macros, enabling the execution of repetitive tasks with a single click. The course also covers programming with VBA (Visual Basic for Applications) to customize automation and perform complex operations. Youâ€™ll explore Power Query for automating data extraction, transformation, and loading processes, and Power Pivot for managing and analyzing large datasets. Additionally, discover how to automate dynamic reports, charts, and workflows, as well as integrate Excel with other tools like Outlook for email automation. Whether youâ€™re a beginner or an advanced user, this course equips you with the skills to harness Excelâ€™s automation capabilities and maximize efficiency in data handling and reporting.
