Mindluster Platform

About the course React JS for Beginners

Plain JS apps usually start with the initial UI created on the server (as HTML), whereas React apps start with a blank HTML page, and dynamically create the initial state in JavaScript. React requires you to break your UI into components, but plain JS apps can be structured in any way you see fit.

Programming Category's Courses

Course Lesson(13)

Lesson 1 : **React JS Tutorials for Beginners 1 Getting Started**

Lesson 2 : **React JS Tutorials for Beginners 2 Simple Demo**

Lesson 3 : **React JS Tutorials for Beginners 3 Components**

Lesson 4 : **React JS Tutorials for Beginners 4 Rendering Multiple Components**

Lesson 5 : **React JS Tutorials for Beginners 5 Props**

Lesson 6 : **React JS Tutorials for Beginners 6 Event Handling**

Lesson 7 : **React JS Tutorials for Beginners 7 State**

Lesson 8 : **React JS Tutorials for Beginners 8 Adding State to Components**

Lesson 9 : **React JS Tutorials for Beginners 9 refs**

Lesson 10 : **React JS Tutorials for Beginners 10 Multiple Child Components**

Lesson 11 : **React JS Tutorials for Beginners 11 Updating State and Removing Components**

Lesson 12 : **React JS Tutorials for Beginners 12 Passing Function as Props**

Lesson 13 : **React JS Tutorials for Beginners 13 Creating New Components**
