About the course Create Excel application to track Purchases

Create Excel application to track Purchases course, in this course teaches you how to design an efficient Excel application for tracking purchases. You will learn how to set up structured tables to record purchase details, including item names, quantities, prices, suppliers, and purchase dates. The course covers essential Excel features like data validation for consistent entries, dropdown lists for easy selection, and conditional formatting to highlight key data points, such as pending or completed purchases. You will also learn how to use Excel formulas to calculate totals, discounts, and track inventory levels. By the end of the course, you'll be able to create a comprehensive, user-friendly purchase tracking system that allows you to monitor costs, suppliers, and stock levels effectively. This Excel-based application is ideal for small businesses or individuals looking to streamline their purchasing process and maintain accurate, up-to-date records.
