About the course Create a Change Log in excel

Create a Change Log in excel course, in this course you'll learn how to build a comprehensive change log in Excel to track changes in your spreadsheets over time. You will understand how to use Excelâ€™s built-in tools, such as cell comments, version history, and tracking changes features, to automatically record updates to data. The course also covers how to manually create a custom change log by designing a table to record changes, including the date, user, type of change, and old/new values. Additionally, you'll explore how to apply Excel's VBA (Visual Basic for Applications) to automate the logging process for more complex scenarios. By the end of this course, you will be able to create a fully functional change log system in Excel, making it easy to track modifications, ensure data integrity, and maintain an organized record of all updates made within your workbooks.
