About the course Building a retirement Planner in excel

Building a retirement Planner in excel course, in this course you'll learn to design and develop a personalized tool for retirement planning. This course guides you through creating a robust planner to track savings, investments, and projected retirement expenses. You'll explore how to use Excel formulas to calculate future income, account for inflation, and estimate living costs post-retirement. Additionally, you'll design interactive dashboards and charts for visualizing financial progress and goals. Automate financial projections and create budget plans to align with your retirement timeline. By the end of the course, you'll have a complete, user-friendly retirement planning application in Excel, empowering you to take control of your financial future.
