About the course Designing Point of sale application in excel

Designing Point of sale application in excel, in this course you'll learn how to create a robust and user-friendly POS system tailored to your business needs. This course covers the essential steps to design and implement a POS application, including inventory management, sales tracking, and automated receipt generation. You'll explore how to build interactive dashboards for real-time insights, customize invoices, and manage customer data efficiently. Additionally, youâ€™ll master Excel tools like formulas, conditional formatting, and macros (VBA) to automate transactions and streamline operations. By the end of the course, you'll have a complete, professional-grade POS system in Excel, helping you simplify daily business operations, improve accuracy, and make data-driven decisions.
