About the course Object Oriented Programming interview

Object Oriented Programming interview course, in this course is designed to help you prepare for Object-Oriented Programming (OOP) interviews by focusing on core OOP principles such as encapsulation, inheritance, polymorphism, and abstraction. You'll learn the fundamental concepts and how they are applied in real-world coding scenarios. The course covers key interview questions and topics, including class design, object creation, method overriding, constructor usage, and handling interfaces. Practical examples and coding exercises will help you strengthen your understanding of OOP concepts and make you more confident in discussing these topics during technical interviews. Whether you're new to OOP or looking to brush up on your skills, this course will give you the tools and knowledge needed to succeed in interviews and showcase your proficiency in Object-Oriented Programming.
